DETAILED ACTION

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, line 5, "the result " lacks a proper antecedent basis. In claim 1, lines 2 and line 10 "the basis" lacks a clear antecedent basis.

Claim 2, line 3, " the function " lacks a clear antecedent basis.

Claims 3 and 4 have similar problems.

3. Claims 1 and 3 are objected to because of the following informalities: in claim 1, line 8, it appears "stop" should be --stops-- and claim 3, line 8, has a similar problem. Appropriate correction is required.

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation

Art Unit: 2125

under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

6. Claims 1 and 3 are rejected under 35 U.S.C. 103(a) as being unpatentable over the acknowledged prior art in view of Nogami et al. 6,442,436.

The acknowledged prior art on pages 1-3 of the instant application teaches a multi-path numerical control system which either stops operation on all the paths or continues operation on all the paths except for the path in which an alarm (single block input) was generated. See pages 1-3 of the instant application. Note lines 6-17 on page 2.

The acknowledged prior art however does not divide the tasks (paths) into groups and stop operation of all tasks (paths) in the group upon a particular condition.

Nogami teaches dividing tasks into groups and when a particular condition, such an emergency, occurs that only specific tasks are disabled while others are allowed to continue. Nogami expressly teaches that this provides a safer system. See the abstract; figures; col. 1, line 52 to col. 2, line 55; col. 3, lines 1-55; col. 4, line 36 on. Note col. 3, lines 42-54.

It would have been obvious to one of ordinary skill in the art to modify the acknowledged prior art in view of Nogami and group the various tasks, such as different paths, into groups and only disable those tasks (paths) in the specific group associated

with the particular alarm (emergency) occurring or in the alternative case to the particular single block signal occurring so as to have a safer system.

7. Claims 2 and 4 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Kawamura 5,010,285 is of interest in the use of single block commands.
